 Fabricated sizes: #3-#18

Wire Mesh

All sizes

Concrete Accessories

Rebar chairs
 Tie wire
 Mechanical Couplers

Dowel bars

Grades 60 and A706
 Stock and custom lengths
 Plain and epoxy coated

DOT & LEED PROJECT EXPERTISE

MPI is DOT certified in many states for stock-length rebar, wire mesh and fabricated rebar materials. We are also well-versed in LEED requirements and can track and supply all related documentation.

ADVANCED TECHNOLOGY

We use a highly advanced operating and administrative software system specifically developed for the rebar industry. Bar codes and Bluetooth scanners allow for real-time tracking, automatic mill and heat assignments and high-level quality control throughout our state-of-the-art automated mill.

Plus, our new customer portal makes it easy to place orders, track shipments and retrieve back-up bills of lading, invoices and proof of delivery. Customers receive all order documentation via email within 24 hours of shipping.

WHY MPI?

EXCEPTIONAL SERVICE

AT MPI, WE PROVIDE STEEL REINFORCEMENT ALONG WITH OUTSTANDING CUSTOMER SERVICE. WE ALWAYS GO THE EXTRA MILE TO MEET YOUR NEEDS, THROUGH:

Fast, Accurate Estimates — We work from your contract drawings to calculate how much reinforcement you need for your project.

Precise Detailing — Our dedicated detailing team uses CAD technology to prepare construction drawings of your project's steel reinforcement.

In-house Fabrication — Our fabrication yards are equipped with best-in-class equipment to meet your specified needs, saving time and space at the job site. All materials are labeled and sorted according to our location drawing.

Rebar Threading — We provide this value-added service from our warehouse/fabrication facilities throughout the country for all US mechanical coupler manufacturers.

Just-in-time (JIT) Delivery — We deliver products as you need them, from our multiple stocking locations and warehouses.

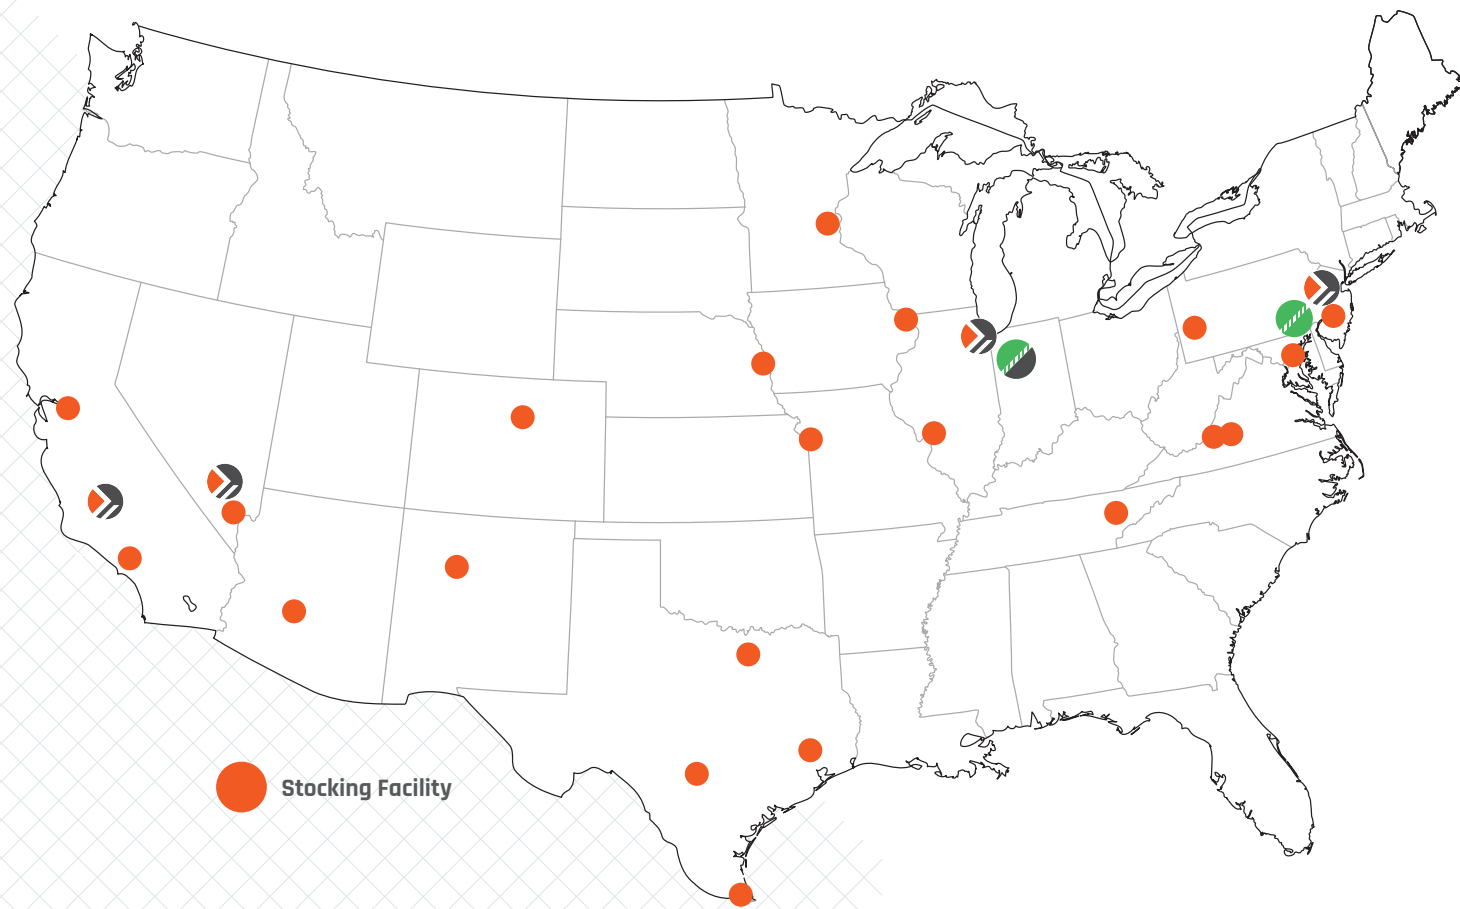

Project Coordination — Your single point of contact works with you to create a plan for releasing materials and ensuring execution, as well as scheduling fabrication, tracking deliveries and change orders, and managing every aspect of your project to ensure accuracy.

Field Services — During construction, we visit your job site regularly to handle additional requests and verify that the project is going smoothly.

MPI LOCATIONS

OUR DISTRIBUTION / FABRICATION NETWORK

Our 25 stocking locations are strategically located to serve customers across the country. In addition, we operate four large regional fabrication facilities in Bakersfield, CA, Las Vegas, NV, Hammond, IN, and our newest in New Castle, DE – a state-of-the-art 148,000 sq. ft. temperature-controlled facility with the most advanced fabrication equipment and epoxy coating line.

Stocking Facility

50/50 partnership with Midwest Rebar Coating

Warehouse / Fabrication Facility
